SUMMARY

Highly motivated Full-Stack Software Developer with experience building scalable web applications using Express.js and React.js. Proficient in developing and integrating RESTful APIs, working with Agile teams, and implementing AI solutions using OpenAI and other AI SDKs. Experienced in deploying applications on AWS, utilizing serverless architecture, and contributing to open-source projects. Quick learner with strong problem-solving, debugging, and collaboration skills.

PROFESSIONAL SKILLS

- **PROFESSIONAL SKILLS:** Design Understanding, Team Collaboration, Problem Solving, Visual Design
- **TECHNICAL SKILLS:** React, HTML, CSS, JavaScript, REST APIs, Git, WebSocket, Postman, Microservices, TypeScript, Python, Next.js, Redis, Redux, TailwindCSS, Node.js, MongoDB, Express.js, PostgreSQL, AWS S3, AWS Lambda, EC2, AWS, Docker

PROJECTS

Time Based Quiz Platform

Mar 2024 - May 2024

- Built a time-based quiz platform with secure user authentication.
- Enabled teachers to conduct tests and analyze student performance via REST APIs and React UI
- Developed backend logic using Node.js and MongoDB.

Transformer-App

Jan 2025 - Mar 2025

Advert Engineer PVT.LTD

Nashik

- Built a machine learning model using Python and React UI
- Enabled prediction of transformer current loss and error.
- Used daily by 50+ electrical engineers.

Dubify

Mar 2025 - Present

- Developing a web platform that transcribes videos into multiple languages and generates SEO content.
- Generates thumbnails with the author's face using Flux Kontaxt, Imagen-4, and GPT-Image-1.
- Performs multilingual dubbing with voice cloning.

EXPERIENCE

Open Source contributor

Jul 2024 - Present

Individual contributor

Remote

- Provided links to pull requests, showcasing contributions to open-source projects
- Merged over 30 pull requests into top open-source projects, enhancing project functionality and user experience
- Contributed to projects like Lingo.dev, SW360, and Klavis.AI, improving code quality and project documentation

Lingo.dev [YC-F24]

Jul 2025 - Present

open source software engineer (contract)

Remote

- Enhanced the CLI by adding new commands to improve developer workflows, utilizing Next.js and React for seamless integration
- Integrated OpenRouter SDK with BYOK support, increasing flexibility for users
- Built a Deno.js SDK optimized for edge environments and Supabase, enhancing performance and scalability
- Optimized the Node.js SDK using the singleton pattern to enhance reliability and reduce resource consumption
- Contributed to the maintenance of open-source SDK and CLI, ensuring they were production-ready and stable

EDUCATION

K.K Wagh Institute Of Engineering Education and Research

Nov 2022 - Jan 2026

Bachelor of Technology, Information Technology

- **GPA:** CGPA: 75%
- **Achievements:** Ranked in the top 5% of developers in the college.
- **Coursework:** Completed key projects using MongoDB, Node.js, React, Express.js

CERTIFICATION

- **Functions, Tools, and Agents with LangChain:** Completed course on building LLM agents using LCEL and function calling for structured output and tool use.
- **ChatGPT Prompt Engineering for Developers:** Completed course on prompt engineering using OpenAI API for tasks like summarization, inference, transformation, and chatbot development.
